

## Green Team Update June 2017

Children had another exciting week of outdoor learning with Deborah Harvey this week. Green Team was provided with sweeping nets and used a figure of eight motion on the surrounding trees and hedges around the school grounds. The sweeping was successful, with children finding a variety of mini-creatures: spiders, crickets, speckled moths and shield beetles.

Deborah Harvey also brought in a variety of different types of moths and African snails for the children to study.
