

# Little Litter Pickers

Our reflections on supporting Barra Hall Park

# Abdullah Z

While we were there, we litter picked in Barra Hall Park. This is our local park.

I was surprised because there were lots and lots of trash and garbage. What we do is important and made a difference because no one litter picks enough in the park. We weighed our collection and it was 11.8 kg of garbage and trash!

# Nicholas

When we went to Barra Hall Park we cleaned up a lot of garbage approximately 11.8kg! Surprisingly when we went to pick up litter there was a lot more than I expected there to be and I also learned that some people do not care as much as some people about the environment. Fortunately we are here to come to the rescue as we picked up so much litter from Barra Hall a lot! Wouldn't you agree?

# Kavya

While we were at Barra Hall Park, I saw rubbish and went to pick it unless it was on the road. I was surprised how much rubbish was there while we were picking up I saw a lighter stuck in the soil. This is dangerous! I told my teacher. I think we made a difference because lots of rubbish was there and we pick it up people don't pick up rubbish from the ground.

# Suhail

When we were in Barra Hall Park we picked up more than 11.8kg of rubbish.

I was surprised because I did not know there would be a lot of trash in the park. There was a lot of plastic in the park too which is dangerous

.The difference was we picked up more trash than last week - the bag was really heavy!

# Abdullah J

I Agree. We picked up trash with the litter pickers and it weighed 11.8kg . I was surprised by the amount of trash in the park too

# Guled

We went to Barra Hall Park to pick up a huge amount of litter due to the amount of it. The amount of litter was unthinkable as there was billions of litter on the grass, we were able to pick up about 11.8KG. We made a difference that we helped the park be tidy from the amount of litter the people threw onto our planet. Litter can kill humanity thus picking up litter would help by a huge amount to save the world!

# Adam

We first picked up litter from our own school and after this we went to Barra Hall Park.

I learnt that littering is really bad and you should never do it. What surprised me is that there was lots of litter. Yes we made a huge amount of difference because first there was lots of litter and after we picked up 11.8 kg of litter! And after we also helped the government by doing the right thing.

Now we know people litter but we are trying our best to help the world!

# Arham

We went to Barra Hall Park to get litter from there. We collected lot of lot garbage We learnt not to throw garbage. I was surprised by how much garbage was there. The bins being there did not seem to make a difference.

## Gracie-May

We went to Barra Hall Park and we were litter picking. It was a good experience and a nice thing to do for the families.

## Amie-Leh

I wanted to do this because I want to learn how to pick up rubbish and look after our local area.

I want to be a good Active Citizen of WEPA.

# Mrs Hussain: Active Citizens Club Leader

I think the children made a huge impact to the way the environment around our school- particularly in the park - was being treated. Not only did they share the learning with each other of what was being found, the shock as to the amount of rubbish as well as the joy to see the amount decrease each week, the Active Citizens of WEPA showed members of the public who watched with pride as our children took care of their local community. The children showed the importance of caring for our planet and the world around us - so much so that people were conscious of throwing away their rubbish in the bin when we came past!

Everyone we met on our trips praised the children and parents were encouraging their young ones to follow this same conscientious behaviour.
