

Nature collage

You can make anything with the things around you!

Equipment:

Sticks, petals, leaves,
feathers, etc
Glue or stick-on paper
Paper

You may want to place a piece of sticky contact paper in a frame, sticky side up. Then place items on the sticky side

Instructions:

1. Go outside (whether it is your garden, on a walk or at the park) and collect natural materials

This is a good opportunity to talk about seasons! The time of year will have a huge impact on what materials are available for your nature collages. The idea of returning to the same spot in different seasons is to compare and contrast what is there.

2. Think of how you want to arrange the materials and then glue them down.

How are you going to arrange them? What are the textures like?

3. Once dry you can enjoy showing your creation to your family.
