

Lets go bowling!

Can you create bowling pins using empty bottles?

You will need:

- 10 empty bottles
- paper
- pen
- ball
- scissors
- glue
- score sheet

With the paper cut out a strip long enough to fit around a bottle, write number 1 on and then glue to the bottle. Repeat this until you have written numbers to 10.

Now lets go bowling! Maybe with your family you might want to pretend you are going to a real bowling alley by 'buying' tickets. Remember to keep score of how many pins you are able to knock down and work how many you need to get to knock all 10 down.

Player Name	1	2	3	4	5	6	7	8	9	10	Total Score
