

## Timber-framed

The frame of the house is made out of wood.

## Thatched/pitch roof

The roof was made out of straw (sometimes other dried vegetation) and clay.

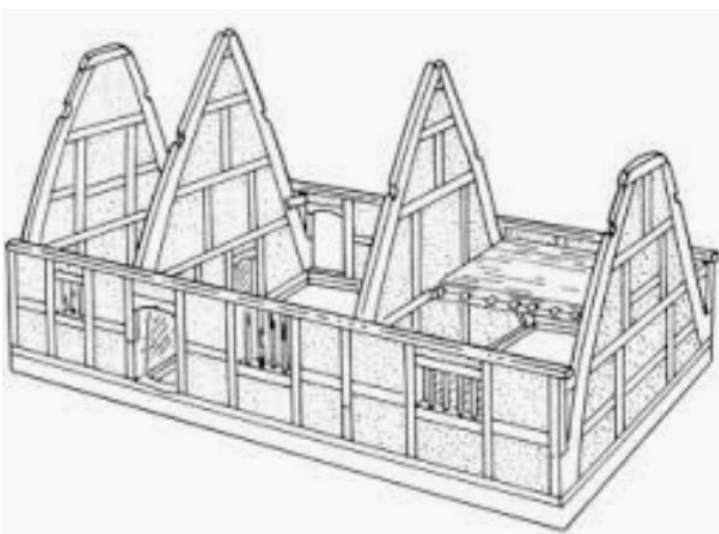

## Straw

Yellow, dried plant stems of crops such as wheat. They are often used for thatching the roof.

## Design

A plan or drawing showing how the building would look like before it is made.

## Clay

Sticky fine grained earth that can be moulded when it is wet. It was used to mix with straws to make thatched roof.

## Wooden beams

A piece of strong wood that was used to keep the roof stay in place.

## Rustic stones

A rough broken stone.

## Sash window

A window which can be opened vertically.
