

**Weather:** The state of the atmosphere at a particular place and time as regards heat, cloudiness, dryness, sunshine, wind, rain, etc...

**Extinct:** (of a species, family, or other larger group) having no living members.

**Endangered:** (of a species) seriously at risk of extinction.

**Safe:** protected from or not exposed to danger or risk; not likely to be harmed or lost.

**Animal:** a living organism that feeds on organic matter, typically having specialised sense organs and nervous system.

**Species:** a group of living organisms consisting of similar individuals capable of exchanging genes or interbreeding.

**Natural Disaster:** a natural event such as a flood, earthquake, or hurricane that causes great damage or loss of life.

**Eco-Warrior:** a person actively involved in preventing damage to the environment

**Global Warming:** a gradual increase in the overall temperature of the earth's atmosphere generally attributed to the greenhouse effect caused by increased levels of carbon dioxide, CFCs, and other pollutants.

**Climate Change:** a change in global or regional climate patterns, in particular a change apparent from the mid to late 20th century onwards and attributed largely to the increased levels of atmospheric carbon dioxide produced by the use of fossil fuels.
